Professional Summary

Full Stack Developer with **10 years of experience** building scalable enterprise applications and cloud-native solutions. Expert in Java, Python, and modern frameworks with deep expertise in **Generative AI**, microservices architecture, and event-driven systems. Proven track record of leading cross-functional teams and delivering high-performance solutions for global financial institutions including **UBS, Morgan Stanley, and Société Générale**.

<> Technical Skills

Languages & Frameworks

Java 17, Python, Spring Boot 3, React.js, Redux, Django, Hibernate

AI/ML Technologies

OpenAI Agentic, MCP Tools, LLM Models, Multi-Agent, Vectors

Databases

PostgreSQL, MySQL, DB2, Elasticsearch, Neo4j, Neptune, Couchbase, Cosmos DB

Cloud & Infrastructure

AWS, Azure, PaaS, FaaS, IaaS, Docker, Kubernetes, Linux

Professional Journey

2023 - Present

Associate Director

3+ Years

UBS Poland

Project: Digital Core Capabilities

Apache Flink

Kafka

Spring Boot 3

Java 17

Cosmos DB

Claude, OpenAI

- Migrated complete legacy systems (13 years old) from Java 8 to Java 17 and modernized cloud infrastructure, enhancing scalability and reliability
- Pioneered GenAI integration by developing MCP tools and intelligent NLP solutions using OpenAI Agentic Framework
- Onboarded complex business workflows to BPMN Flowable, reducing process automation time by 40%
- Led adoption of Clean Code practices including SOLID principles, DRY, and code review standards
- Experience in high-throughput data pipeline processing millions of events daily

 **Reduced data processing latency by 60%**

2022 - 2023

Senior Software Engineer

4 Months

UBS (via Luxoft/DXC Technologies)

Project: Payment Services

Java Spring Boot 2

DB2

ELK

Couchbase

- Developed and maintained critical payment processing services ensuring PCI compliance
- Implemented caching strategies using Couchbase, improving response times by 35%
- Conducted code reviews and enforced clean coding standards across development teams

2021 - 2022

Senior Software Engineer

1.2 Years

Morgan Stanley

Project: Client Onboarding System (COSS)

Python

Java

React.js

Spring Boot 2

Microservices

- Built client-facing onboarding application processing 500+ client registrations monthly
- Developed full-stack features for Cash and Security Transfer Authorization
- Implemented intelligent cache management reducing database load by 45%

2019 - 2021

Software Development Engineer II

1.6 Years

Société Générale

Project: Helios - Test Strategy Management Platform

Java

React.js

Spring Boot 2

PostgreSQL

AWS

Docker

- Architected backend framework from scratch using Spring Boot and Hexagonal Architecture
- Developed React.js components for enterprise UI serving 1000+ internal users
- Established CI/CD pipelines using Jenkins, Docker, and monitoring via ELK stack

 **Star of the Quarter Award**

2017 - 2019

Software Engineer

2.3 Years

L&T Infotech (LTI)

Project: Document Production & Salesforce Integration

Java

Python

Spring Boot 2

MySQL

Docker

- Designed and deployed RESTful APIs for automated document generation
- Containerized applications using Docker and orchestrated deployments with Docker Swarm
- Implemented test automation frameworks improving code coverage to 85%

 **Mercerthon Hackathon Winner**

Education

Bachelor of Engineering

T.C.E.T, Mumbai

2013 – 2017 | CGPA: 7.5/10

Higher Secondary Education

Gyan Deep English School, Varanasi

2012-13 | 82%

Certifications

Certified Engineer – UBS

Java Certified Programmer

Python Certified Programmer

Advanced Google Analytics

CI/CD Pipeline Certification

Additional Information

Languages: English (Professional), Hindi (Native)
